

# Power Stance®

## Powdered Coconut Oil

- Conditioning supplement for all classes of horses
- May assist coat condition, digestive health and stamina
- GMO and sugar free
- Easy to feed, no mess no fuss

### What is Power Stance®?

- Powdered Coconut Oil
- A rich source of Medium Chain Triglycerides (MTCs)
- High energy (29.4MJ/kg or 3.18MCal/lb)
- Power Stance contains 70% natural coconut oil
- Brilliant coat, mane and tail condition
- May conserve muscle glycogen, allowing horses to train harder for longer
- MCTs comprise lauric and capric acids which may have antimicrobial actions (i.e anti-viral, anti-bacterial, anti-fungal)
- Assists in maintaining appetite and natural digestive function

### Feeding Guidelines

#### Maintenance and coat condition:

Morning feed: 1 x 1oz scoop  
Night feed: 1 x 1oz scoop

#### Light to moderate work:

Morning feed: 3 x 1oz scoop  
Night feed: 3 x 1oz scoop

#### Heavy work and show:

Morning feed: 5 x 1oz scoop  
Night feed: 5 x 1oz scoop

#### Weight gain:

2oz/220lbs  
Body weight

Based on a 1000lb horse

8.5oz of Power Stance is equivalent in energy to 1 cup of vegetable oil

### Ingredients

Coconut oil, Purified GM free corn starch, Hydrated Silica

### Sizes Available

5lb / 15lb

## Information on Feeding Oils

### Why feed oils?

Oil is 2 to 3 times more energy dense than cereal grains - so you can feed less oil to give the same amount of energy. This is especially useful for those horses that won't eat when in training. Feeding oils may help to give coat, mane and tails a healthy and glossy appearance.

### Which Oil is Best?

Most commercial equine feeds contain polyunsaturated fats (PUFAs) including soy, corn, rice and linseed oils.

These polyunsaturated fatty acids may cause an Omega 6 and Omega 3 imbalance. These oils are metabolised slowly through the lymphatics, prone to rancidity, and contains a high level of Omega 6 which may cause inflammation.

Coconut oil is a saturated oil which is absorbed directly into the portal blood and provides a ready source of non glucose energy. Saturated oils promote greater storage and utilisation of muscle glycogen in horses during exercise, this means the horses may work harder for longer.

### Nutrient Information

Digestible Energy: 29.4 MJ/kg | 3.18 MCal/lb

Oil: 70% (coconut oil)

Max crude fibre: <0.5%

Fatty acids: Lauric acid (C:12): 44%  
Myristic Acid (C:14): 17.5%  
Palmitic (C:16): 8%  
Oleic (C:18:1): 6%

Power Stance contains no artificial flavours, colours or preservatives.

## Testimonial

"My farrier comments on how healthy Jum Jum Spirit's hooves are. I put nothing on these tough, healthy feet – it is purely his healthy diet and exercise. Jum Jum Spirit's **glossy coat, healthy hooves and soft flowing mane and tail have improved since Power Stance was introduced into his diet.** Packed with all the goodness of coconut oil Power Stance has cleverly been powdered which has made feeding coconut oil a dream."
