

Turmericle®

Turmeric and Coconut Oil Powder

- Supports normal inflammation response
- Supports healthy joint function
- May assist skin health
- Contains resveratrol and black pepper

What is Turmericle?

Turmericle is a unique powdered blend of well researched nutraceutical herbs including two varieties of turmeric, black pepper and resveratrol, which may help with conditions such as joint inflammation and skin conditions. Combined with our own powdered coconut oil, this easy to feed powder is suitable for horses and dogs.

Feeding Guidelines

Turmericle should be introduced gradually into diet over a two week period

Horses:

Morning feed: 1 x 1oz scoop
Night feed: 1 x 1oz scoop

Recommended dose for a 1000lb horse. Halve dose for 500lb horse.

Dogs:

Morning feed: 1 x teaspoon
Night feed: 1 x teaspoon

Recommended for a 25 - 30lbs dog

Ingredients

A Proprietary Blend of [Turmeric (Curcuma longa & Curcuma xanthorrhiza), Lauric acid (coconut oil), Resveratrol (Japanese Knotweed), Black Pepper (Piper nigrum)] 28 g.

Sizes Available

1lb / 5lb / 15lb

About the Ingredients

Turmeric

Turmeric contains a blend of two different species of turmeric to optimize the benefits they both offer. One form, *Curcuma longa*, is the traditional type of turmeric commonly used in cooking, foodstuffs, cosmetics and medicine. *Curcuma xanthorrhiza*, has been used as a traditional medicinal plant in some tropical countries such as Indonesia and Malaysia. It contains the xanthorrhiza oil which confers unusual benefits.

Power Stance® powdered coconut oil

Power Stance is powdered coconut oil designed to make feeding oil easy. Coconut oil contains high levels of medium chain triglycerides (MCTs) which provide the body with a readily available source of lauric acid, which converts to monolaurin and may provide anti-bacterial, anti-microbial and anti-fungal properties. The benefits of supplementing animals with coconut oil may include improved digestive health, enhanced coat and skin condition.

Coconut oil is absorbed directly into the portal blood, and therefore is metabolized faster than other oils.

Ground Black Pepper

Curcumin is treated as a foreign substance by the liver. It is therefore rapidly metabolized and excreted. Piperine in black pepper blocks curcumin excretion by the liver and increases curcumin bioavailability. Piperine activity is reduced in sunlight. Turmeric must be stored in a sealed container.

Resveratrol

Resveratrol is produced in plants to maintain their general health. Normal body functioning gives rise to free radicals with production greatly increased during inflammation and stress. Resveratrol has been added to Turmeric as it is an antioxidant that may help the body efficiently detoxify these free radicals and shows signs of being cardio-protective, anti-cancerous and anti-inflammatory. The resveratrol is derived from Japanese knotweed.

Testimonial

Before

After 3 Weeks

After 1 Year

"A year ago I started adding Turmeric to the feed of my Percheron Opie, to help with his itchy and sore tail. After only 3 weeks I could see a difference, with the redness reduced and hair beginning to regrow. Now, one year later, his itch has practically gone and he looks INCREDIBLE. Thanks for making the best product ever, he has been on it for a year straight, I can't stop raving about it."

Macy Morris, 2016
